

MD HQ API:

Tag Endpoints:

Please note: All dates listed (creation times, update-times) are listed in UTC, so you'll want to adjust for your local timezone. Please also note that this set of endpoints is for managing the master tag list – if you're looking to see how to grab patients with specific tags or how to apply tags to patients, please see the /patients endpoints.

1. Get All Tag Definitions from the Master Tag List

Endpoint: /v1/tags

Method: GET

Arguments:

- include_deleted: (optional) defaults to false, but any non-empty value will include deleted tags in the returned array

Sample Call:

```
curl -X GET "https://un:pwd@subdomain.md-hq.com/api/v1/tags"
```
